Microsoft 70-336: MCSE: Core Solutions Lync Server 2013

Module 1: Handling Design And Architecture For Microsoft Lync Server 2013

- Course And Instructor Introduction
- Introduction To Lync Server 2013 Architecture - Part 1
- Introduction To Lync Server 2013 Architecture - Part 2
- Introduction To Lync Server 2013 Architecture - Part 3
- Introduction To Lync Server 2013 Architecture - Part 4
- Introduction To Lync Server 2013 Architecture - Part 5
- Introduction To Lync Server 2013 Architecture - Part 6
- Introduction To Lync Server 2013 Core Capabilities
- Introduction To Lync Server 2013 Design Process
- Evaluate Infrastructure Requirements And Update The Design
- Plan For All Phases Of Microsoft Solutions Framework - Part 1
- Plan For All Phases Of Microsoft Solutions Framework - Part 2
- Plan For All Phases Of Microsoft Solutions Framework - Part 3
- Module 1 Questions

Module 2: Designing A Lync Server 2013

- Plan Infrastructure Requirements For Lync Server 2013 - Part 1
- Plan Infrastructure Requirements For Lync Server 2013 - Part 2
- Use The Lync Server 2013 Planning Tool
- Use The Topology Builder - Part 1
- Use The Topology Builder - Part 2
- Plan The Server Infrastructure
- Design Documentation With The Use Of Microsoft Office - Part 1
- Design Documentation With The Use Of Microsoft Office - Part 2 And Module 2 Questions

Module 3: Installing Lync

- Prepare For Installation
- Install Lync - Part 1
- Install Lync - Part 2

Module 4: Using Management Tools And RBAC

- Using Management Tools - Part 1
- Using Management Tools - Part 2
- Using Management Tools - Part 3
- Using Management Tools - Part 4
- Using Management Tools - Part 5
- Using Management Tools - Part 6

Introduction To Role-Based Access Control
Module 4 Questions

Module 5: Deploying And Managing Clients And Devices

Prepare For Client Deployment
Deploy And Manage Lync 2013 Clients
Prepare For Device Deployment And Module 5 Questions

Module 6: Conferencing In Lync Server 2013

Introduction To Conference In Lync Server 2013 - Part 1
Introduction To Conference In Lync Server 2013 - Part 2
Design For Web And Audio-Video Conferencing
Introduction To Dial-In Conferencing In Lync Server 2013
Manage And Administer Conferencing And Module 6 Questions

Module 7: Designing And Deploying External Access

Introduction To Lync 2013 External Capabilities - Part 1
Introduction To Lync 2013 External Capabilities - Part 2
Plan For IM And Presence Federation
Design Edge Requirements - Part 1
Design Edge Requirements - Part 2
Module 7 Questions

Module 8: Deploying Microsoft Lync Server 2013 Persistent Chat

Introduction To Persistent Chat Architecture And Design Considerations In Lync Server 2013
Deploy And Configure Lync Server 2013 Persistent Chat And Module 8 Questions

Module 9: Archiving And Monitoring

Introduction To The Archiving And Monitoring Services
Configure Archiving And Monitoring And Module 9 Questions

Module 10: Administering And Maintaining Lync Server 2013

Administering And Maintaining Lync Server 2013 - Part 1
Administering And Maintaining Lync Server 2013 - Part 2

Module 11: Configuring And Managing High Availability In Lync Server 2013

Introduction To High Availability In Lync Server 2013
Design Load Balancing - Part 1
Design Load Balancing - Part 2

Module 12: Understanding Disaster Recover In Lync Server 2013

Understanding Disaster Recover In Lync Server 2013 - Part 1

Module 13: Planning a Migration to Lync Server 2013

Introduction To Coexistence And Migration - Part 1

Introduction To Coexistence And Migration - Part 2

Introduction To Coexistence And Migration - Part 3

Introduction To Migration Steps - Part 1

Introduction To Migration Steps - Part 2

Plan For Clients And Devices And Design Client Migration And Device Migration Strategy

Course Outro
