Microsoft 70-742 Identity in Windows Server 2016 MCSA

Module 1: Installing and Configuring Domain Controllers

Introduction

Overview of Identity Management Concepts Part 1

Overview of Identity Management Concepts Part 2

Active Directory Domain Services Components Part 1

Active Directory Domain Services Components Part 2

Active Directory Domain Services Components Part 3

Overview of ADDS Domain Services Part 1

Overview of ADDS Domain Services Part 2

Deploying Domain Controllers Part 1

Deploying Domain Controllers Part 2

Deploying Domain Controllers Part 3

Module 2: Managing AD DS Objects

Overview of Object Management Part 1

Overview of Object Management Part 2

Managing User Accounts Part 1

Managing User Accounts Part 2

Managing User Accounts Part 3

Managing User Accounts Part 4

Managing User Accounts Part 5

Managing Groups Part 1

Managing Groups Part 2

Managing Groups Part 3

Managing Computer Accounts Part 1

Managing Computer Accounts Part 2

Managing Organizational Units Part 1

Managing Organizational Units Part 2

Module 3: Securing Active Directory Domain Services

Managing Organizational Units Part 1

Managing Organizational Units Part 2

Implementing Account Security Part 1

Implementing Account Security Part 2

Auditing AD DS

Configuring Managed Service Accounts

Module 4: Working with Complex AD Infrastructures

- Overview of Advanced AD DS Deployments
- Deploying a Distributed AD DS Environment Part 1
- Deploying a Distributed AD DS Environment Part 2
- Deploying a Distributed AD DS Environment Part 3
- Overview of AD DS Replication
- Configuring AD DS Services Part 1
- Configuring AD DS Services Part 2
- Configuring AD DS Services Part 3

Module 5: Implementing Group Policy

- Overview of Group Policy Part 1
- Overview of Group Policy Part 2
- Overview of Group Policy Part 3
- Creating and Configuring GPOs Part 1
- Creating and Configuring GPOs Part 2
- Monitoring and Troubleshooting Group Policy
- Managing Security Options for Computers using Group Policy Part 1
- Managing Security Options for Computers using Group Policy Part 2
- Managing User Environments Part 1
- Managing User Environments Part 2
- Managing User Environments Part 3

Module 6: Understanding Microsoft Azure AD and Directory Synchronization

- Planning Directory Synchronization Part 1
- Planning Directory Synchronization Part 2
- Implementing Azure AD Connect Part 1
- Implementing Azure AD Connect Part 2
- Managing Identities with Directory Synchronization

Module 7: Monitoring and Recovering AD DS

- Monitoring AD DS Part 1
- Monitoring AD DS Part 2
- Monitoring AD DS Part 3
- Database Management
- Backup and Recovery in AD DS Part 1
- Backup and Recovery in AD DS Part 2

Module 8: Implementing Active Directory Certificate Services

- Overview of Public Key Infrastructure and AD CS Part 1
- Overview of Public Key Infrastructure and AD CS Part 2
- Deploying Certificate Authority Hierarchy
- Administering Certificate Authorities
- Deploying and Managing Certificates Part 1
- Deploying and Managing Certificates Part 2
- Managing Revocation and Distribution
- Configuring Certificate Recovery

Module 9: Implementing Active Directory Federation Services

Overview of AD FS

Planning and Deploying AD FS

Overview of Web Application Proxy

Module 10: Implementing Active Directory Rights Management Services

Overview of AD RMS

Deploying AD RMS

Protecting with AD RMS

Conclusion
