Certified Kubernetes Administrator (CKA)

Module 1: Course Overview

- 1.1 Course Overview
- 1.2 Course PreReqs

Module 2: Kubernetes and Container Fundamentals

- 2.1 Core Concepts
- 2.2 What is the CKA Exam
- 2.3 Why Get Certified
- 2.4 CKA Exam Domains
- 2.5 What is Kubernetes
- 2.6 What is a Container
- 2.7 What is Docker
- 2.8 Kubernetes Terminology
- 2.9 Kubernetes Components
- 2.10 Kubernetes Documentation
- 2.11 Whiteboard - Kubernetes Overview

Module 3: Kubernetes Installation

- 3.1 Kubernetes Installation
- 3.2 Installation Options
- 3.3 MiniKube
- 3.4 Demo - Install Minikube
- 3.5 Demo - Clusters
- 3.6 Kubectl Basics
- 3.7 Demo - Install Kubectl

Module 4: Working with Kubernetes Clusters and Nodes

- 4.1 Working with Kubernetes Clusters and Nodes
- 4.2 Understanding the Architecture
- 4.3 Understanding the nodes
- 4.4 Core Objects
- 4.5 API
- 4.6 Create a Cluster
- 4.7 Demo - Create a Cluster
- 4.8 Demo - YAML
- 4.9 Demo - Nodes
- 4.10 Demo - Kubectl Client Config

Module 5: API Access and Commands

- 5.1 API Access and Commands
- 5.2 About the API
- 5.3 Accessing the APIs
- 5.4 Demo - Exploring APIS
- 5.5 Kubectl
- 5.6 Using YAML for API Objects
- 5.7 Using Curl
- 5.8 Labels and Annotations

Module 6: Running Pods and Deployments

- 6.1 Running Pods and Deployments
- 6.2 Pods and Deployments
- 6.3 What is a Namespace
- 6.4 Scalability Options
- 6.5 Rolling Updates
- 6.6 Apply Changes to a Pod
- 6.7 Stateful Sets
- 6.8 Demo - Manage Deployments

Module 7: Configuring Storage

- 7.1 Configuring Storage
- 7.2 Storage options with Kubernetes
- 7.3 Configure Pod Volumes
- 7.4 Configure Persistent Volumes
- 7.5 Storage Classes
- 7.6 Whiteboard - Persistent Volumes
- 7.7 Demo - Configure Storage

Module 8: Kubernetes Networking

- 8.1 Kubernetes Networking
- 8.2 Understanding Networking
- 8.3 Services
- 8.4 Network Plugins
- 8.5 DNS
- 8.6 Network Policies
- 8.7 Namespaces
- 8.8 Demo - Networking
- 8.9 Manage High Availability

Module 9: Managing Security

- 9.1 Managing Security
- 9.2 Kubernetes Security
- 9.3 Container and Pod Security
- 9.4 Certificates
- 9.5 API Security

- 9.6 Configmaps and Secrets
- 9.7 Secure Images
- 9.8 Security Context
- 9.9 RBAC

Module 10: Managing Kubernetes In the Enterprise

- 10.1 Managing Kubernetes In the Enterprise
- 10.2 Cluster Management and Maintenance
- 10.3 Demo - Scale Deployment
- 10.4 Demo - Restart Cluster
- 10.5 Demo - Add or Remove Nodes
- 10.6 Demo - Create a Pod in the Background
- 10.7 Kubelet Restarts and Drains
- 10.8 UI Dashboard
- 10.9 Demo - Describe Resources
- 10.10 Kube-scheduler
- 10.11 Demo - Set-Up Alias

Module 11: Kubernetes Monitoring and Troubleshooting

- 11.1 Kubernetes Monitoring and Troubleshooting
- 11.2 Monitoring Resources
- 11.3 Monitoring Pods
- 11.4 Demo - Monitoring Pods
- 11.5 Logging
- 11.6 Demo - Logging
- 11.7 Troubleshooting
- 11.8 Affinity and Taints

Module 12: CKA Practice Exams

- 12.1 CKA Practice Exams
- 12.2 Exam Preparation Must Know
- 12.3 Question 1 - Create a Cluster, Deploy Pods and a Deployment
- 12.4 Question 2 - Create a Pod and Verify
- 12.5 Question 3 - Create a Pod with a Secret
- 12.6 Question 4 - Get Logs on a Pod and Send to File
- 12.7 Question 5 - Liveness Probe
- 12.8 Question 6 - Use Labels
- 12.9 Additional Questions

Module 13: Course Closeout

- 13.1 Course Closeout
- 13.2 Course Review
- 13.3 Kubernetes Certifications
- 13.4 Additional Resources
- 13.5 Exam Readiness
- 13.6 Course Closeout
