Microsoft 70-414: Implementing an Advanced Server Infrastructure

Module 1: Manage and Maintain a Server Infrastructure

Introduction

Manage And Maintain A Server Infrastructure-Part1

Manage And Maintain A Server Infrastructure-Part2

Design A Monitoring Strategy-Part1

Design A Monitoring Strategy-Part2

Plan And Implement Automated Remediation-Part1

Plan And Implement Automated Remediation-Part2

Plan And Implement Automated Remediation-Part3

Module 2: Plan and Implement a Highly Available Enterprise Infrastructure

Plan And Implement A Highly Available Enterprise Infrastructure-Part1

Plan And Implement A Highly Available Enterprise Infrastructure-Part2

Highly Available Network Services-Part1

Highly Available Network Services-Part2

Plan And Implement Highly Available Storage Solutions-Part1

Plan And Implement Highly Available Storage Solutions-Part2

Plan And Implement Highly Available Roles-Part1

Plan And Implement Highly Available Roles-Part2

Business Continuity And Disaster Recovery Solution

Module 3: Plan and Implement a Server Virtualization Infrastructure

Plan And Implement Virtual Hosts - Part 1

Plan And Implement Virtual Hosts-Part2

Plan And Implement Virtual Machines

Plan And Implement Virtualization Networking-Part1

Plan And Implement Virtualization Networking-Part2

Plan And Implement Virtualization Storage

Plan And Implement Virtual Machine Movement

Manage And Maintain A Server Virtualization Infrastructure

Module 4: Design and Implement Identity and Access Solutions

Design And Implement Identity And Access Solutions-Part1

Design And Implement Identity And Access Solutions-Part2

Implement And Manage Certificates

Design And Implement A Federated Identity Solution

Design And Implement AD Rights Management Services

Conclusion
